Recitation Labyrinth

This spiritual tool is built to help you recite a prayer or meditate on a thought.

The goal is to recite all of the possible ways to form a phrase, going from the First Square (Top-Left) to the Last Square (Bottom-Right).

1. Start at the First Square. This is now your current square.

2. Follow these instructions repeatedly: From your current square, you will either have a choice of going down or right, or be on an edge, forced to go in one direction, or at the Last Square. Every time we have a choice, we will leave a token behind to remind us how to get back to the choice point.

Making a move

Case 1. If you have a choice (that is, you can go down or right):

1. Place a token on the current square
2. Move down

Case 2. If you are forced to move right (that is, you are on the bottom row),

1. Move right

Case 3. If you are forced to move down (that is, you are on the right-most column),

1. Move down

Case 4. If you are at the Last Square:

1. Recite the prayer or intention
2. Backtrack unless you are done

   Case 2.1. If there are no tokens left on the card, you are done!

   Case 2.1 Otherwise:

   a. Find the most recently placed token (this will be the token furthest down), and move to this square.
   b. Remove the token.
   c. Move Right.

REPEAT UNTIL YOU ARE DONE!
